Analiese Rising

Brenda Drake

***Half-Blood* meets the *Antigoddess* in this new series from *NY Times* bestselling author Brenda Drake.**

After a dying man gives Analiese Jordan a list of names and hers is one of the few names not crossed off, she agrees to go with the man's grandson, Micah, to find the other people on the list and unlock the secrets behind the clues in the man's satchel.

Unbeknownst to Analiese, she and the others on the list are descendants of the Gods of Death. They have the power to raise the dead and control them, but those raised become strong and evil, with a tendency of decaying and losing limbs.

During their search, they discover Micah's grandfather belonged to a group, pledged to save and protect the Death Risers from two groups of gods and their descendants. One wants to control them and use the Raised for an army, and the other wants to destroy them.

If Analiese and Micah don't decipher the clues to finding out the truth about her and whom she should trust, Analiese could end up being a puppet to the wrong set of gods and become the destroyer of humankind as we know it.

Brenda Drake grew up the youngest of three children, an Air Force brat, and the continual new kid at school. Her fondest memories growing up are of her eccentric, Irish grandmother's animated tales, which gave her a strong love for storytelling. So it was only fitting that she would choose to write stories with a bend toward the fantastical. When she's not writing or hanging out with her family, she haunts libraries, bookstores, and coffee shops, or reads someplace quiet.

To Whatever End

Lindsey Frydman

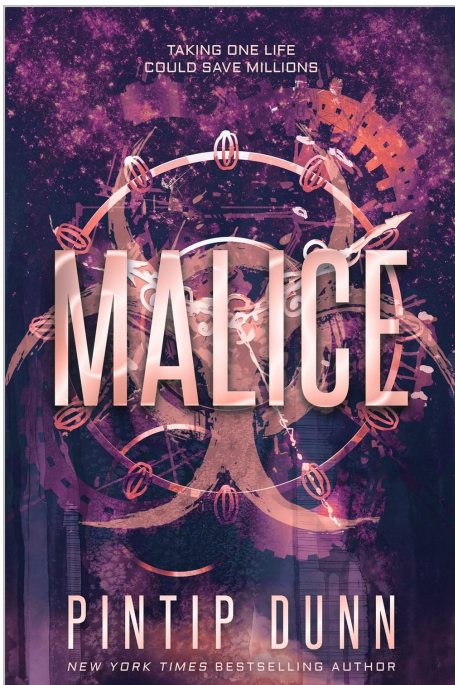

A contemporary love story with a small paranormal twist: what happens when you've found the one, only for the future to show he dies in your arms?

Quinn is cursed. Nothing deadly. Nothing particularly cruel. With one touch, she can see the ends to all her romantic encounters—like she was hit with some kind of twisted Cupid's bow. (And there's nothing romantic about that.) So she does not, under any circumstance, date. Quinn Easterly is not available or interested. Ever.

Until she meets Griffin. When the two of them touch, a vision sparks—one where Griffin is shot, bleeding, dying in Quinn's arms. And then he utters three words she's never heard—words she thought she'd never hear: *I love you.*

Whether by coincidence or by “fate,” Griffin keeps showing up. And the more she sees of him, the less she can ignore the vision. She might never have been able to prevent the horrific predictions before, but this time, she can't simply walk away. She can't let him die. Even if Quinn can't change the future, can't save him, she at least has to try. Even if it means breaking her own heart when the fated ending finally arrives and she discovers she might've been to blame all along.

Lindsey writes about heart-stopping romance, rule-breaking heroes, and everyday magic. She lives in Columbus, Ohio (where the weather is never quite right). Her BFA in Photography and Graphic Design has granted her a wide assortment of creative knowledge that serves mostly as inspiration. When she's not crafting stories, you'll likely find her spending waaay too much time on Pinterest, gaming, or performing in a burlesque show—because she enjoys giving her introversion a worthy adversary.

***Dead Zone* meets *Sixth Sense* when a girl learns that a boy in her class will one day launch World War III. Can she kill his still-innocent self today in order to save millions of lives tomorrow?**

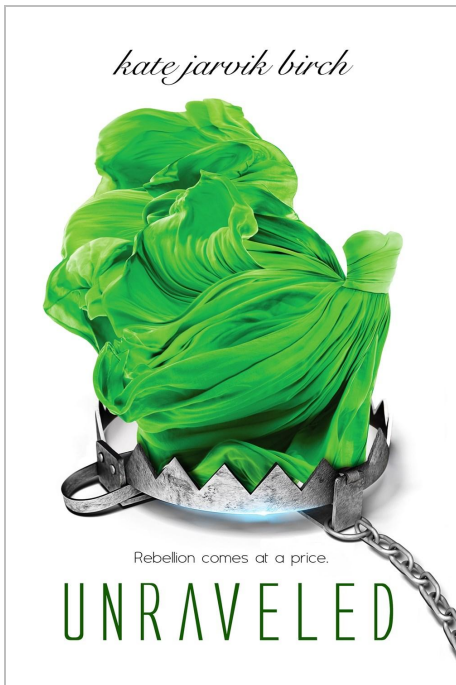

Could you kill an innocent life today to save millions in the future?

Seventeen-year-old Alice has spent her entire life in the shadows of her charismatic twin brother. And she's utterly content to stay there, as not taking risks means that she doesn't get hurt. Until the day a strange voice appears in her mind, demanding that she approach Bandit, the cute Thai boy in her physics class—and kiss him. Never mind that she's never spoken a word to him before.

Compelled by the excruciating pain in her head, Alice reluctantly obeys. But submitting to the voice sets off a series of bizarre demands, tasks that don't seem to follow any rhyme or reason. Determined to figure out who the voice is and what it wants, Alice hurtles into a dangerous investigation into the tangled link between the future and the present.

What she discovers shakes her to the core. Twenty years from now, a boy from her class will launch World War III, and it is up to Alice to stop him. Problem is, she doesn't know his identity. And even if she can figure out who he is, will she be able to take the biggest gamble of all: killing his still-innocent self today in order to save millions of lives in the future?

Kate Jarvik Birch

Fans of Kiera Cass will love this gritty, satisfying final book in the Perfected series by visual artist and author Kate Jarvik Birch.

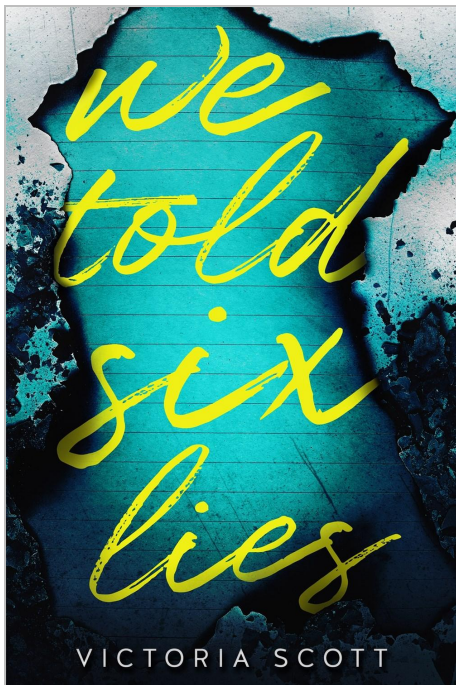

Ella isn't anyone's pet anymore, but she's certainly not free.

After exposing the dark secrets about NuPet's breeding program, forcing them to repeal the law that allowed genetically modified girls to be kept as pets, she thought girls like her would finally be free. But she never dreamed that it would backfire. NuPet may have convinced the public of their intentions to assimilate pets back into society, but Ella knows it's a lie.

They aren't planning mass rehabilitation... they're planning a mass *extermination*.

Now, with the help of a small group of rebels, she's set on finding a way to bring down NuPet for good. But when her group gets implicated in a string of bombings, it becomes clear that none of them are safe—not her, not Penn, not even his family. And with the possibility of a spy planted somewhere in her group, there's no way to know whom she can trust. If she can't untangle the web of blackmail and lies that extends far beyond NuPet's reach, she won't just lose her chance at freedom, she'll lose everyone she loves.

Kate Jarvik Birch is a visual artist and author living in Salt Lake City, Utah with her husband and three kids. Her essays and short stories have been published in *Isotope*, *Saint Ann's Review*, *Scissor's and Spackle* and *Indiana Review*. Remember how many lies we told, Molly? It's enough to make my head spin. You were wild when I met you, and I was mad for you. But then something happened. And now you're gone.

But don't worry. I'll find you. I just need to sift through the story of us to get to where you might be. I've got places to look, and a list of names.

The police have a list of names, too. See now? There's another lie. There is only one person they're really looking at, Molly.

And that's yours truly.

Eyes on Me

Rachel Harris

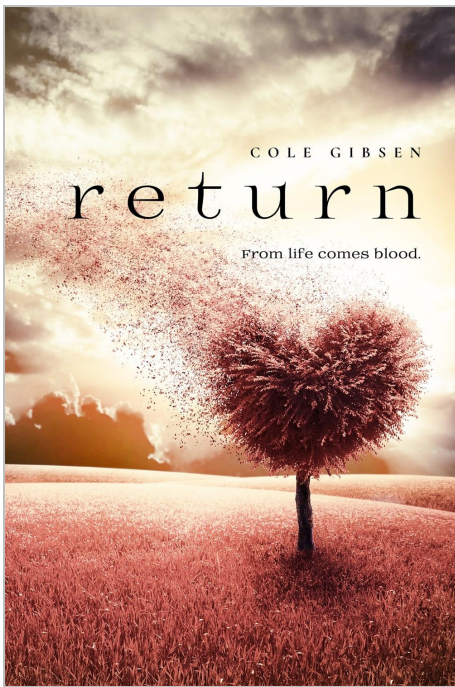

New York Times bestselling author Rachel Harris returns to YA with a passionate, emotional romance perfect for fans of Sarah Dessen or Huntley Fitzpatrick.

Look up the word “nerd” and you’ll find Lily Cooper’s picture. She’s got one goal: first stop valedictorian, next stop Harvard. Until a stint in the hospital from too much stress lands her in the last place a klutz like her ever expected to be: salsa dance lessons.

Look up the word “popular” and you’ll find Stone Torres’s picture. His life seems perfect—star of the football team, straight-A student, lots of friends. But his family is struggling to make ends meet, so if pitching in at the Torres dance studio helps, he’ll do it.

When Lily’s parents offer Stone extra cash to volunteer as Lily’s permanent dance partner, he can’t refuse. But with each dip and turn, each moment her hand is in his, his side job starts to feel all too real. But in dance, as in life, one wrong move and someone could get hurt.

New York Times & *USA Today* bestselling author Rachel Harris writes humorous love stories about sassy girls-next-door and the hot guys who make them swoon. Vibrant settings, witty banter, and strong relationships are a staple in each of her books...and kissing. Lots of kissing. Visit her online at www.RachelHarrisWrites.com.

Return

Cole Gibsen

Full of mystery and romance, the second book in the Blood Eternal series is a fast-paced, literary thriller.

I've finally learned the truth. I was born a monster. But exactly what kind? Yeah, that's the million-dollar question.

Since my blood can kill vampires on contact, I'm not just their demise—I might also be the greatest weapon in their war to destroy each other. Sure, most vampires suck (no pun intended), but I don't want to wipe them all off the face of the earth. Especially since I find myself hopelessly falling for a particular dark-haired, broody-eyed vamp.

When even my own dog has secrets, it's pretty safe to say I can't trust anyone. So when my mother tells me my destiny is to kill the bloodsucker I love, I'll do anything to prove her wrong—even if she says I'll die trying.

At seventeen Cole found herself homeless with only a beat-up Volkswagen Jetta and a bag of Goodwill clothing to her name. The only things that got her through the nights she spent parked in truck stops and cornfields were the stacks of books she checked out from the library along with her trusty flashlight. Because of the reprieve these books gave her from her troubles, Cole vowed to become a writer so she could provide the same escape to readers who needed a break from reality.

Smoke and Key

Kelsey Sutton

An intricate gothic paranormal romance about a girl trying to solve the mystery of how she entered the Underworld, perfect for fans of Libba Bray or Kiersten White

A sound awakens her. There's darkness all around. And then she's falling...

She has no idea who or where she is. Or why she's dead. The only clue to her identity hangs around her neck: a single, rusted key. This is how she and the others receive their names—from whatever belongings they had when they fell out of their graves. None of them remembers who they used to be. Under is a place of dirt and nightmares, and Key is determined to discover the secrets of her past in order to escape it.

She needs help, but who can she trust? Ribbon seems content in Under, uninterested in finding answers. There's Smoke, the boy with sharp words and a fierceness that rivals even the living. And Journal, the boy who stays apart from everyone else and loses himself in books and science. Key's instincts tell her that there is something remarkable about each of them, even if she can't remember why.

Then the murders start, bodies that are burned to a crisp. After being burned, the dead stay dead. Key is running out of time to discover who she was—and what secret someone is willing to kill to keep hidden—before she becomes the next victim.

Kelsey Sutton is the author of *The Lonely Ones*, a middle-grade novel in verse that received a starred review from Kirkus. She is also the author of *Some Quiet Place*, and its companion novel *Where Silence Gathers*, both published by Flux. She is also the author of the YA e-book original *GARDENIA*.
