Smithsonian: STEM Lab

By (author): Jack Challoner
Contributions by: Smithsonian Institution

Jan 29, 2019 | Forthcoming \$25.99 CAD

From building a bridge and crafting a catapult to making a marble run and creating a crane, *Smithsonian: STEM Lab* is packed with activities that young readers can do at home to explore, discover, and understand the way the world works.

How are rockets fired into space? How is energy harnessed? How do buildings survive earthquakes? With fun, hands-on projects and experiments, this book reveals how science, technology, engineering, and math are woven through the world around us.

Simple steps guide readers through the stages of each project, with spotlights on the key science, technology, engineering, and math learning involved in each project along the way. ABOUT THE CONTRIBUTOR

Author **Laurie Calkhoven** lives in New York City. She is the author of many books, including *George Washington: An American Life* and *Harriet Tubman: Leading the Way to Freedom*. She also has written extensively for Simon & Schuster's Ready to Read "You Should Meet" series, including books on Misty Copeland, Mae Jemison, Jesse Owens, Lin-Manuel Miranda, and others. Laurie has always been fascinated by history, and especially by the ordinary people who got caught up in extraordinary moments in history. She likes the small moments and bizarre facts that mostly get left out by the serious history books—like whether or not a broken egg kept the American Revolution on track, and how putting your hands in your pockets and jiggling change could lead to an arrest in Nazi-occupied France.

Literacy Consultant **Stephanie Laird** is an instructional coach at Mitchellville Elementary in Mitchellville, Iowa, and is currently serving on the International Literacy Association's (ILA) Board of Directors through 2019. Beautifully illustrated, the book starts by showing all sorts of colorful butterflies. Then through the story of the swallowtail, children learn how a butterfly grows. Close-up photos show the mommy swallowtail laying her eggs, the tiny caterpillar hatching and growing, and the pretty butterfly emerging from its chrysalis. The fully grown swallowtail's scaly, brightly patterned wings lift up from the page as fluttery flaps, and more flaps reveal three other caterpillars transforming into incredible butterflies and an amazing moth. As well as the butterfly life cycle, the book includes other butterfly facts, such as how they feed, how they spread pollen, and how they are similar and different to moths.

Perfect for reading aloud, and with stage by stage pictures that tell the butterfly story, every page is easy to follow, and the combination of exciting, crystal-clear photos and charming artwork will hold the interest of the very young.

With a friendly approach to life cycle science for young learners, *How Does a Butterfly Grow?* is an informative picture book to share and enjoy. It makes a great educational gift.

Feminism Is...

By (author): DK
Foreword by: Gemma Cairney

Feb 12, 2019 | Forthcoming \$16.99 CAD

A lively and accessible book for teens on the history, pioneers, theories, questions, arguments, and daily reality of feminism today.

What is feminism? Combining insightful text with graphic illustrations, this engaging book introduces young adult readers to a subject that should matter to everyone. Posed as a series of questions, *Feminism Is...* tackles the most intriguing and relevant topics, such as “Are all people equal?”, “Do boys and girls learn the same things?” and “Why do women earn less than men?” Find out what equality for women really means, get a short history of feminism, and take a look at the issues that affect women at work, in the home, and around sex and identity. Meet, too, some great women, such as Gloria Steinem, Frida Kahlo, and Malala Yousafzai, “rebel girls” who refused to accept the status quo of their day and blazed a trail for others to follow.

With more than 50 questions that address key feminist concerns, *Feminism Is...* takes on the issues in informative, thought-provoking ways.

My Very First Bible

By (author): DK
Illustrated by: Diana Mayo

Feb 05, 2019 | Forthcoming \$18.99 CAD

This stunning Bible re-tells 25 favorite Bible stories from the Old and New Testaments with a modern sensitivity for today's children and their parents and grandparents.

My Very First Bible begins with the Creation Story and Adam and Eve and culminates in the story of Christ's resurrection. The clear, expressive text, supported by gorgeous full-colour artworks, guides the parents and grandparents through the enjoyable experience of reading wonderful Bible stories aloud to their children and grandchildren for the first time.

The stories, combined with specially selected scripture references, instill an early awareness and understanding of the Bible through either "read-to-me" sharing of the exquisite drawings and easy-to-follow text, or quiet, read-alone contemplation.

Interactive panels help even the youngest reader engage in the stories - for example, picking out animal pairs in Noah's Ark.

A wonderful first biblical book for children and families to treasure, making it the perfect christening gift for children everywhere.

By (author): DK

Mar 19, 2019 | Forthcoming \$28.99 CAD

Journey back in time and find out where the dinosaurs roamed. This unique children's atlas explores each continent, revealing fossil sites and stories on every map.

Part of the best-selling *What's Where on Earth* series, this atlas is packed with maps of early Earth and more than 50 profiles of dinosaurs and other prehistoric animals. Stare down a *T. A modern 3D globe next to each map helps you understand the arrangement of the continents over time and why we find fossils where we do.
